ABOUT ME

I started my technology journey in 2015 as a developer, gaining experience in software development, automation, cloud platforms, server administration, and CI/CD pipelines.

Today, I am focused on transitioning into cybersecurity through hands-on learning, security research, and technical writing.

I am actively seeking internship and junior level opportunities to build practical experience and grow as a security professional.

PROJECTS

Security Lab Setup: Built a VirtualBox lab with Kali Linux and Windows, deploying DVWA and OWASP Juice Shop for hands-on web application security testing using Nmap, Burp Suite, SQLmap, and Wireshark.

CERTIFICATIONS, VIRTUAL EXPERIENCE & CTF

Shields Up: Cybersecurity Job Simulation — AIG (Forage), 2026

Cybersecurity Job Simulation — MasterCard (TheForage), 2026

GhostWire CTF — Astria Institute of Technology, 2026

Cyber Job Simulation — Deloitte (TheForage), 2026

Certified Ethical Hacker (CEHv9) — EcCouncil, 2018

EDUCATION

BCA (Hons), The University of Burdwan — 62.55%

12th Standard, J.A.C Ranchi — 52.40%

10th Standard, J.A.C Ranchi — 73.00%

ACHIEVEMENTS

Completed 225+ TryHackMe Rooms & Challenges

TryHackMe 45+ Badges

TryHackMe Top 1%

TECHNICAL SKILLS

Security: Nmap, Wireshark, SQLmap, Burp Suite, Splunk, CyberChef, Metasploit

Programming: Python, Rust, JavaScript, Bash, Git

Platforms: Kali Linux, Ubuntu, Windows, Docker, VirtualBox, AWS

LEARNING & PRACTICE

OverTheWire: Natas (In Progress)

TryHackMe: Jr Penetration Tester (In Progress)

TryHackMe: Cyber Security 101

TryHackMe: Pre Security

TryHackMe: SOC Level 1

TryHackMe: DevSecOps

OverTheWire: Bandit

Practice: OWASP Juice Shop

Practice: DVWA
